

HECKLER & KOCH P2000 LEM VAR. 2 9MM, \$879

Gun Tests grade: B+

Of the two guns that scored the best in terms of accuracy, the Sig Sauer was faster in our rapid-fire segment. But taking into account the accuracy achieved from the bench, we think it might be worth putting in the extra time to learn to shoot the HK LEM system faster.

The HK magazine release was a paddle that can be pushed down from either side. It can be operated with the thumb, but some of our staff preferred using the middle finger from the opposite side.

The LEM trigger featured a long take-up that was met with a hard break. We were rewarded with fine accuracy from the bench, but learning to fire multiple shots quickly with the LEM trigger will take practice, in our opinion.
