Length of Pull.....	13.25 in.	Magazine Type.....	Glock 17 Compatible	Made In.....	USA

**A great advantage of the Kel-Tec is its ability to take 33-round Glock 17 magazines. The magazine fits into the grip frame in the proven UZI fashion.**

**The reciprocating bolt handle is contained in the buttstock — the charging handle had to be somewhere. When you fire the Kel-Tec, keep your hands out of the way of the bolt handle.**

**Space-age material allows for an affordable, lightweight carbine. The Kel-Tec stands alone as a lightweight folding 9mm carbine. Even extended, the modular design is quite compact, and when folded, it will readily fit in most briefcases.**
