

CZ USA 75D PCR COMPACT NO. 91194 9MM, \$651

GUN TESTS GRADE: A-

At last, a decocker that helped make the first shot smooth and short. Even with some roughness to the single-action trigger, this gun landed the tightest groups.

Left: Unlike most semi-automatic pistols, the CZ frame rails fit over the slide.

Above: This low-mount rear sight is a new component. Outstanding accuracy was achieved because the increased visibility helped us control the sights all the way through controlled press and ignition.

Left: After using the left-side-only decocker, we felt the hammer stayed much further back than other traditional double-action pistols. This shortened trigger reach and decreased the

time required to fire the first shot double action. The two vertical lines on the frame and slide are for alignment during takedown.

Right: The full-texture rubber grips are not new, but we liked them anyway. The stylish high-profile magazine release was a welcome addition.
